Good researchers are just not the 9-to-5 type.

At the Stelco Research Centre, we are lucky enough to have a lot of people who find it satisfying and absorbing to do continuous research into new steels.

Some of our experimental steels will improve life today; others might change the pattern of the future. Some day we'll make steels coloured right through . . . Steels so flexible you'll be able to tie them into knots . . . Steels you'll be able to see through . . . And steels so decorative, so light and so resilient you'll never know them as steel.
